Digital Thread laces decision-making, data for Air Force acquisition

“For the Air Force, a concept born in the lab is set to change the way weapon systems are developed and maintained throughout the lifecycle, taking advantage of artificial intelligence, virtual reality, physics and probability to enable the ‘right decisions’ at the ‘right time.’

The Digital Thread concept, conceived in the lab in 2007 and increasingly permeating industry, is a technological framework that helps organize data across the life span of a product--from initial design to manufacturing, operation and maintenance -- interconnecting data, modeling and analysis to enable better decisions at all product life stages. It’s a new way of organizing the traditional “paper trail” of data typical of each phase of the acquisition process and is revolutionizing the way engineers think about design, manufacturing, supply chains and sustainment, moving to model-centric processes and beyond...”

Check Out the NMUSAF's Events That Are OUT OF THIS WORLD!

[The National Museum Of The United States Air Force](#) is hosting a space celebration through August 7th, in honor of the [Apollo 15](#) mission, which occurred 50 years ago. This mission, which lasted 17 days, had a longer stay on the Moon and a greater focus on science than earlier landings. Fifty years later, the findings from this trip are still crucial in understanding the moon and space itself.

The exciting celebration includes interactive events each day, perfect for enthusiasts and families alike, such as a Lunar Viewing, "Space Suits" presentations, a real Lunar Rover Vehicle on display, Space Trivia Contests, the Solar System 5K Fun Run, and free build and launch activities!

While at the museum, visit the "[SPACE: A Journey to Our Future](#)," a highly interactive temporary exhibit, running until September 6th.

Check out [The National Museum Of The United States Air Force's website](#) for more information and registration for the [Solar System 5K Fun Run](#).

Rediscover Downtown Dayton's Art!

This Saturday, August 7th, come together with the [Downtown Dayton Partnership](#) to rediscover "[Art in the City](#)," an all-day event across downtown celebrating Dayton's best artistic talents! This event will feature live performances, live demonstrations, hands-on activities, interactive classes, a local artisan market, a juried art show, and much more. With events happening from 11 a.m. to 7 p.m., there's something around every block for you and yours to enjoy. Unite with your community and help [#RediscoverDowntownDayton!](#)

Stay in the "Looped" and See the Show at the Loft Theatre

Don't miss the [Human Race Theatre Company's](#) live show "Looped" through August 22nd.

Tickets are available on the [Human Race Theatre Company's website](#). This newest production at the [Loft Theatre](#) is *"based on a real event, which has been the subject of gossip for years in Hollywood. Looped takes place in the summer of 1965, when an inebriated Tallulah Bankhead, well-known for her husky voice, outrageous personality, and devastating wit, returns to the studio to redub — or loop — one line of dialogue for her last movie, Die! Die! My Darling! Bankhead's outsized personality dominates the young, frustrated film editor who is knocked for a loop by the tempestuous stage and screen icon."*

Come out Wednesday, August 4th, at 8 p.m. for a "pay what you can sneak peek" night at the Human Race Theater with cash donations for [The Neon](#) or canned goods for the [Dayton Foodbank](#). Tickets are available on a first-come, first-served basis for Wednesday night.

Get to know The Contemporary Dayton in our Rediscover Business Spotlight!

In this series, we profile some of the small businesses that make downtown great! We ask a series of questions about each business, letting them tell you about themselves in their own words, including their background, what services they offer, how they're responding to the pandemic challenges, and more. It's a great way to learn more about your favorite businesses, or discover a new spot you may not be familiar with yet.

This week we learn about a downtown art gallery that recently opened its new location in the Dayton Arcade, showing Ohio-based and nationally known artists.

Blogs We're Reading

We recommend checking out a recent blog post by Amy Blankson. [Why It's On Leaders To Champion Digital Wellness In The Post-Pandemic Workplace](#). "Over the past year, 76% of employees did not receive any training to support them in the transition to remote work. Now, a year later these employees are burned-out, isolated, and looking to their employers for guidance. Here's what you can do to help." - Amy Blankson

We are excited to have Amy with us on September 23 as a part of our Executive Development program.

**Dayton Manufacturing
Documentary**

Have you seen We Still Make Things?

As COVID-19 emerged in Ohio, our local personal protective equipment (PPE) supply orders were being redirected to COVID hotspots instead of Dayton area hospitals.

FastLane and the other Ohio Manufacturing Extension Partnership (MEP) offices, the Ohio Manufacturers' Association (OMA), Ohio Hospital Association (OHA), nursing homes and JobsOhio joined forces as the Ohio Manufacturing Alliance to ask Ohio manufacturers to help in produce PPE.

Industry Products Company (IPC) was one of the companies who volunteered to help and an unlikely team came together to make sure medical workers had the protection they needed.

CLARK STATE COLLEGE

Professional Sales Ready Certification

The 7 week, 33 hour, non-credit online Sales Ready Certification Program is highly interactive. It uses revealing assessments and true- to- life role plays to prepare students for successful sales careers that align with their strengths. It also enhances and strengthens the skills anyone needs to succeed in today's in-demand job market.

Earners of the Clark State Professional Sales Ready Certification badge have demonstrated an ability to effectively take a customer through the life cycle of a sale. Students mastered research, qualifying the prospects, applying negotiation tactics, and calculating a compelling RIO. Students demonstrated knowledge of customer relationship management CRM technology, sales goal planning, critical thinking, articulation, and communication skills.

Intern Wage Reimbursement

Manufacturers hiring interns can receive reimbursement of **up to \$1,500 for student wages (50% of student wages up to \$3,000)** from the Ohio Manufacturing Extension Partnership (MEP) High School Internship Program

Current program funding is available first come, first serve and is available to cover internship wages from **June 1st, 2020 through September 30th, 2021.**

If you have any questions or would like to learn more, please contact [April Vanover](#) or your Ohio MEP Partner based upon the region in which you are located.

Testimonies/Success Stories:

"...We focus on providing students their first job in an industrial setting whether in the shop or office. For about half our interns it is their first job of any kind; for the rest it is their first job outside of retail or fast food. As a result, we spend a lot of time on the soft skills; showing up on time every day, reporting & accountability, productivity & accuracy, and, surprisingly, how to fill out a job application, behave in a job interview and how to prepare a resume. Over the past forty years Stonebridge has provided these jobs to over 250 students. I really appreciate your assistance through the MEP Internship Program. It has allowed us to provide an opportunity to twice as many students over the past few years as we could otherwise afford.

I hope that the program will be available this coming year. With all the corona craziness, I think it will be more important than ever to get kids off to a solid start on their careers, both for their sake and for the sake of our future workforce."

-Eddy, Stone Bridge

Operating Co., LLC

*"...we currently have *a student intern* working full time (or as much as [their] schedule allows) with the intent of retaining [this person] full time when [their] other obligations are complete. [He has been] a pleasure to work with and we consider ourselves lucky to have him!"*

DAYTON REGIONAL GREEN

SUSTAINABILITY LUNCHEON

CSR... ESG..., Alphabet Soup... What Are We Talking About??

Key Note Presentation:

Join us for a conversation on the sustainable trend of companies and organizations that is igniting change, building engagement and long-term company growth, as well as catalyzing action on pressing social issues – all while meeting shareholders expectations.

Our presenters will provide background and guidance on the emergence of **ESG** (Environmental, Social and Governance) for organizations and explain its relevance to sustainability professionals. This quick review from industry insiders will help you to develop your own ESG path and then share that message with colleagues and clients.

Bring Your Green Updates

Our team will review the latest bills and whistles added to Bring Your Green energy tracking platform that provides detailed results on energy usage on monthly and annual basis to better assist companies in reaching their sustainability goals, reduce costs and greenhouse gas emissions and prioritize buildings for action.

A proud partner of the American Job Center network

Miami University's College of Engineering and Computing continues to develop and strengthen relationships with business partners to enhance the students' experience and benefit the company. The Senior Design Project is an incredible way for students and companies to partner to solve an engineering and computing problem. Students gain real-world design and project experience while working through a design process. Businesses interact and engage with the students and benefit from the technical skills and expertise of the students and the faculty advisor while creating close relationships with the students for future work.

Company Benefits

- Work first hand with creative and resourceful students:
 - To recruit
 - Build company's brand
- Diverse design team lead by faculty expert
- Solve those nagging problems
- Potential for new process, opportunities, and reduced costs

Student Benefits

- Gain hands-on experience
- Interact with industry professionals
- Work closely with faculty advisor
- Apply academic knowledge to real-world problems:
 - Problem solving and critical thinking
 - Project management
 - Leadership
 - Team-building
 - Communication
 - Technical

Company Expectations

- **Identify a project idea:**
 - Appropriate for an entry-level engineering or computing employee
 - Eight-month timeframe (September to April)
 - Three to five team members
 - Not time sensitive but an issue that is on the back burner that no one else has time to address
 - Multi-disciplines teams are acceptable and encouraged
- **Identify project champion who can commit to regular interaction with the student team including:**
 - answering questions
 - providing feedback
 - attending the kick-off meeting
 - attending the project presentation
- **Provide all of the information, data, resources, and background necessary for the project team**
- **Determine the project budget**
- **Optional Company activities:**
 - Attend team meetings
 - Host the students at your facility/site for a tour
 - Make a tax-deductible donation to support the design team
 - Provide employees to act as judges for the student presentations

ECONOMIC DEVELOPMENT

BRIDGING THE FINANCIAL GAP IN SMALL CITIES & COMMUNITIES: OPPORTUNITY FUNDS AND OTHER INVESTMENT SOLUTIONS.

Does it seem like the major cities get all the investments and your small community is stuck with nothing? This makes your job as an economic development professional even more challenging because without those investments, the more difficult it is to meet community needs for housing, jobs, medical facilities, etc. And don't even get us started with standard banking in small cities compared to major ones.

But don't worry, there's still hope for your small, unique community! **Join us on August 24 at 1 PM, CST** with Deborah Burns, from InvestUS, where we will teach you how to overcome these challenges. Deborah and her team have a variety of strategic relationships that can help you seal the deal on investments, no matter how small your community.

TRACK 1: The True Cost of Carbon: Unequal Impact and Policy Response

Policies and regulations to potentially curb greenhouse gas emissions and slow global warming often come at a cost, but what is the cost of doing nothing in terms of our society, our economy, and our environment? Join this panel to understand how policy can impact community resilience, economic activity, environmental equity, and global warming. Our experts will present and compare policy options to abate carbon emissions from the energy sector, the need for aggressive decarbonization, and the impact policy has now and what role it could play in the future.

TRACK 2: The Business Case for Intelligent Building Management

Is your building drifting away from its original design intent and wasting precious resources? When buildings are first designed, complex building equipment and systems are fine tuned to ensure the building performs as expected to meet energy efficiency targets and maintain occupant comfort.

Over time, these design intentions can be overridden or eroded by aging equipment, software failures, and human error. Join this panel to learn about how Intelligent Building Management can help your team monitor building automation and energy systems, analyze-real time data, highlight anomalies, and identify precisely where staff and resources are most valuable. The end result will be a building performing at its peak, saving energy and reducing emissions to benefit the environment and your bottom line.

PM EDUCATION SESSIONS

TRACK 1: Climate Action at the Local Level

Join this panel to learn how leaders at the local level are mobilizing to reduce emissions by 2030 and keep the 1.5 C temperature goal within reach. Private and public sector experts will share insights into their organization's efforts to reduce their carbon footprint and embed sustainability into day-to-day operations and long-term goals. Walk away from this session with a clear picture of how your organization can tackle wasted resources, reduce energy consumption, and engage your employees and stakeholders to make meaningful change.

TRACK 2: How Higher Education is Preparing for a Net Zero Future

In the past two decades, higher education institutions have led the charge for sweeping changes to reduce greenhouse gas emissions and mitigate climate change. Most recently, 75 universities called for the United States to cut carbon emissions by 50% by 2030 with a goal of getting to Net Zero by 2050. Learn from these higher education leaders about how they are creating a Net Zero future on campus, and the tools, tactics, and strategies they are implementing to bring about that change.
